

## What Our Parents say...

“This is my 2nd year enrolled in the program and I am still so impressed with how these classes have captured the interest of both my 4 yr old son and 3 yr old daughter!”  
— Amy P, Mother of Roman & Isabella

“It’s outstanding I highly recommend it to any parent looking to give their child a jumpstart.”  
— Dan G., Father of Gabriella

“What an extraordinary program! My kids literally hopped, skipped, and jumped on they here. Its creative, educational, and fun!”  
— Gina M, Mother of Luisa

A favorite activity since 1991

For over a decade, Imagine Tommorrow® has been nationally recognized for its innovative approach:

Founders selected to speak at NAEYC (National Association for Education of Young Children) annual Conference

Highlighted in Kids & Computers, Entrepreneur, Continental Profiles Magazines, and on NJ News, CNBC, and CNN.

### Program Overview...

- Classes are structured to provide the perfect mix of group interactivity and individual computer time where children work on their own computers. Children boost the following skills:
  - Keyboarding & Computer Basics
  - Internet & Digital Communications
  - Thinking & Problem Solving
  - Early Reading & Writing
  - Listening Comprehension
- All classes are kept small to guarantee your child receives plenty of personal attention from Imagine Tomorrow certified teachers.
- Custom Imagine Tomorrow software scaffolds to your child's individual academic and technical ability levels.
- After each class, the Imagine Tomorrow website is updated with details of the lessons learned that day and a sampling of software for reinforcement at home!

Click and Learn Adventures is a proud provider of Imagine Tomorrow® Computer Classes for Kids.

### What a Class Entails...

It is the number one goal of Imagine Tomorrow to prepare all young children with the skills they will need to succeed in their future. From the very first class, children receive more than just computer basics. Each experience integrates sophisticated technology concepts such as E-mail and the Internet in an age-appropriate way that even our youngest students understand and enjoy.

During class, children become Computer Detectives on a learning adventure to imaginative places such as the E-mail Trail or Internet Island. Classes start with an interactive video voicemail describing a new, fun-filled mission. Children then move on to their own computers where they work on custom software designed specifically for each mission. Advancing at their own pace, children proudly apply new technology skills to solve problems and accomplish their goal. When class ends, children continue to enjoy their mission from home with online software activities that correspond to the current lesson.

The result is more than just a class. Imagine Tomorrow® is a positive learning experience that not only boosts computer and literacy skills, but also builds self-confidence in an environment where every child is successful.
